Claims

12. A system comprising:

means for transmitting at least a part of one or more mote-addressed content indexes, the one or more mote-addressed content indexes including at least one of a mote-addressed sensing index or a mote-addressed control index.

15. The system of claim 12, wherein said means for transmitting at least a part of one or more mote-addressed content indexes further comprises:

means for transmitting at least a part of at least one of a mote-addressed sensing index or a mote-addressed control index, the at least one of the mote-addressed sensing index or the mote-addressed control index including at least one of a sensing information or a control information other than data collected by a mote and including at least one of a format used to query one or more devices contained within a mote, a control function associated with one or more devices contained within a mote, or a feedback format associated with a feedback provided by one or more devices contained within a mote.
